Presentation version for non-technical audiences

# 1) Daily Owner Dashboard

## QUICK STATUS CHECK

## What users can do here

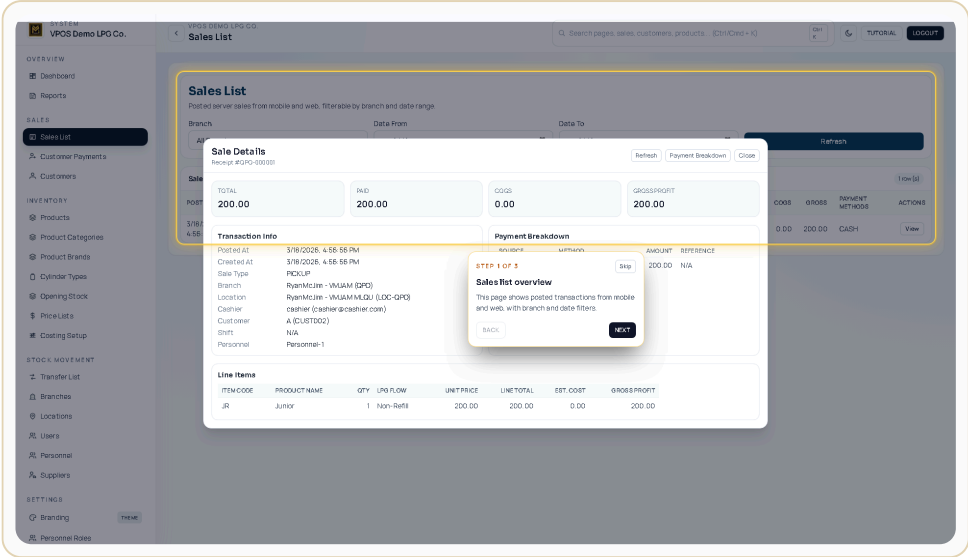

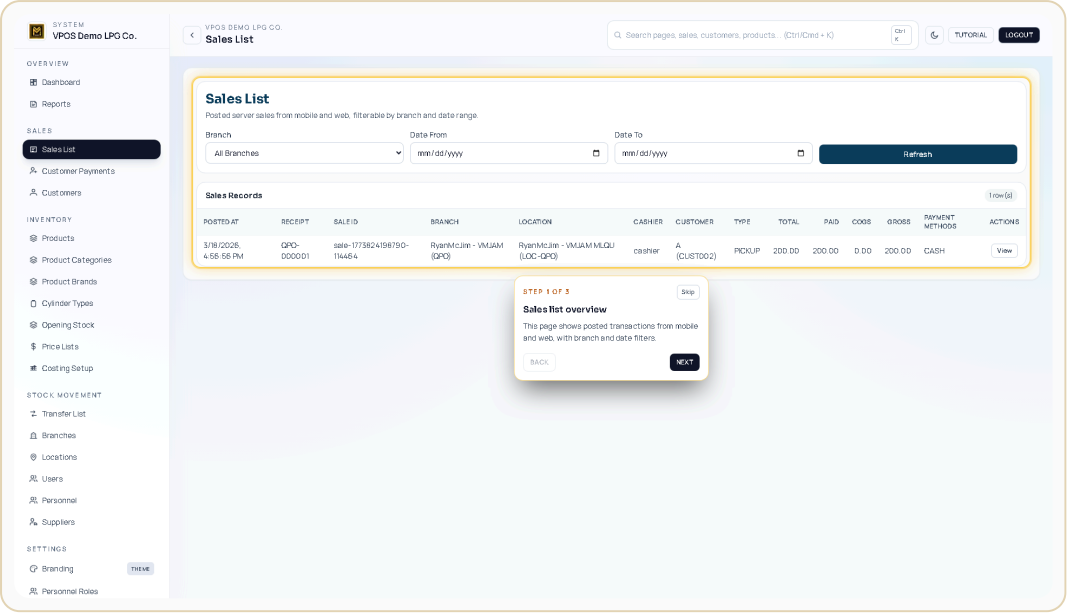

- See daily sales, trends, and important alerts in one view.
- Check if branches are healthy without opening many pages.
- Spot issues early (stock risk, sync issues, pending reviews).

## Business value

- Faster decisions at the start of the day.
- Less manual checking and fewer blind spots.

## 2) Sales Monitoring

TRACK EVERY TRANSACTION

Sale Details: view line items, payment, and settlement breakdown.

Sales List: browse and filter transactions by branch/date.

### 3) Customer Tracking

Price Lists

Create easy-to-understand pricing rules. Higher priority wins automatically. Contract, Tier, Branch, then Default.

Search by name, code, target.

Add Price List

Default Price (All Customers)  
Used when there is no branch, tier, or contract override.  
PRIORITY 4

Branch Override  
Applies only to one branch. Overrides global default.  
PRIORITY 3

Customer Tier Price  
Applies to a customer group like PREMIUM or REGULAR.  
PRIORITY 2

Specific Customer Contract  
Highest priority. Applies only to one customer.  
PRIORITY 1

| PRICE LIST                                                             | WHO GETS THIS PRICE        | WHEN ACTIVE                            | PRODUCTS                                                 | STATUS | ACTIONS |

Opening Stock Setup

Set initial quantity on hand and average cost per location and SKU using a controlled inventory ledger entry.

Safe Process

1. Use this only for go-live opening balances.  
2. Do not use after sales/transfers already started for the same SKU/location.  
3. After go-live, use stock adjustment workflow (not opening stock) for corrections.  
4. Use Force Replace only for opening-only corrections before transactional movements.

Apply Opening Stock

Use a controlled modal workflow for opening stock setup.

Open Apply Modal

## 8) Why teams like it

SIMPLE + PRACTICAL

- **Non-technical friendly:** clean pages and straightforward workflows.
- **Role-based access:** right data for owner, admin, and cashier roles.
- **Ready for growth:** supports multi-branch and warehouse operations.
- **Operational confidence:** sync monitoring and audit trail built in.
